Povzetek European Union cooperation in the field of education and training has developed in a number of areas that now have well-established roots. The best-known example is possibly the Bologna Process that led to the establishment of the European higher education area. The Copenhagen Declaration lent impetus to a process of cooperation in vocational education and training. This was accompanied by two strategic framework agreements for European cooperation in education and training (ET2010 and ET2020). The stocktaking on the expiry of the second framework for cooperation – ET 2020 – revealed some positive trends as the numbers of both young children in early childhood education and of graduates rose. However, the number of underachieving 15 year-olds remains high and the participation of adults in learning is low. The European Commission, the Council of the EU and the European Parliament seem to concur that cooperation in education and training needs to be reinforced. The Commission has set out its vision for a European education area in three communications, which show that this is still work in progress. The Council, on the other hand, has endorsed another framework for cooperation up to 2030, which is clearly aimed at supporting the implementation of such an area. The May 2021 Education Council conclusions give pointers as to how aspects of this area are to be addressed. The debate in the European Parliament is in its initial phase with the rapporteur noting that, while there is agreement on the need for a European education area and ongoing cooperation, the European institutions have yet to adopt a single approach.

Povzetek Statistics show that students with a migrant background are not as integrated in formal education as other students. Yet the term 'students with a migrant background' catches many different individuals. Some of those students may have been born in the country in which they are studying, with their parents or grandparents being the ones to have moved states. Some of the new arrivals are asylumseekers or refugees, who may have experienced chronic stress and severe trauma. Some students have chosen to study abroad but, though they come from a different country, they are not considered migrants. This infographic looks at the complex picture behind the statistics, and at how authorities in Member States address the inclusion of migrant students through their policies.

Povzetek Early childhood education and care (ECEC) services for children – from birth to compulsory primary school age – form an essential part of policies for work-life balance and for better social cohesion. A policy mix of flexible labour market arrangements, generous leave policies and quality ECEC services allows choices for parents, and at the same time supports the healthy development of their children. Member States are increasingly establishing well-functioning, efficient systems. Investing in early-years services brings the greatest returns, and is generally more successful than later remedial action. Until recently, ECEC was mainly considered as a vehicle for helping parents, primarily women, to (re)integrate into the labour market across the EU. Lately, there has been a growing awareness about its multiple benefits for children's personal development and social integration, including mitigating inequalities and preparing for later employability. This is particularly the case for disadvantaged children. The quality of life of young children is an important element in building smart, inclusive and productive societies. Quality accessible ECEC is an indispensable part of ensuring a quality childhood and building a resilient society.

Povzetek In 2002, the European Council decided in Barcelona to set targets for the availability of childcare facilities. Member States agreed to provide childcare by 2010 to at least 90% of children between 3 years old and the mandatory school age and to at least 33% of children under 3 years of age. The Workshop organised by the Policy Department takes stock of the situation in Belgium, France, Germany, Latvia, the Netherlands, and Slovakia. Besides, analyses are presented of the effects of the crisis and to what extend the offer of childcare services has been combined with other policies to encourage female employment and the reconciliation of work and family life.

Povzetek Ta študija obravnava razvoj politike po Evropi na področju predšolske vzgoje in izobraževanja (PVIZ). Razvijajo se najnovejše politike EU, da bi zagotovili strukturo in vsebino za razvoj politike na nacionalni ravni. Ta študija predлага nosilne stebre za kakovost PVIZ, saj povezuje podatke iz različnih virov, v njenem okviru pa so bile izvedene dodatne podrobne študije držav. Poleg tega pa ta dokument na podlagi temeljite preiskave dobrih praks po vsej EU ponuja predloge in priporočila za razvoj kakovostne predšolske vzgoje in izobraževanja v celotni EU.
