Povzetek In 2019 the European Universities Initiative started. Since then, 44 European Universities alliances were created, with 340 participating higher education institutions. This study evaluates the selection procedures and assesses the experiences of the first years. It also drafts three scenarios to map future developments. Recommendations to the EP aim to strengthen the sustainability of the EUAs, create better regulatory conditions and improve the learning processes.

Povzetek Starting with milk in the 1970s, the EU has a long history of supplying agricultural products to school children. With a dedicated EU school scheme for the 2017-2023 period, the EU is currently funding the distribution of fruit, vegetables, milk and milk products, and also educational and information measures. The main policy objective is to ensure that children's nutritional needs are met and healthy eating habits and lifestyles are established. The European Parliament is scrutinising the implementation of the school scheme with a report on the subject that will be considered by its Committee on Agriculture and Rural Development in the autumn of 2022. This European implementation assessment (EIA), produced by EPRS in support of the committee's work, shows that despite a significant level of flexibility in terms of national-level implementation, schools and suppliers face a good deal of red tape, and this is seen as the main factor reducing the scheme's effectiveness. The EPRS findings were based partly on a purpose-made school survey. It collected more than 14 000 individual contributions from schools (including directors, teachers and parents) located in all Member States. The good response clearly demonstrates the importance the school community attributes to the EU school scheme.

Povzetek During the 27 May 2015 plenary session, Members will be asked to vote on a report prepared by the Committee on Agriculture and Rural Development, amending the European Commission's legislative proposal on a new single scheme for fruit and milk in schools. The proposal aims to merge two separate existing schemes, one for the distribution of milk, and the other, fruit and vegetables, in schools. However, the plan remains uncertain since the Commission has put it on hold pending an evaluation of the earlier schemes. There is also disagreement on the legal basis of the draft regulation between the Council, on the one hand, and the Commission and the Parliament, on the other.
